To: Wirick, Holiday <wirick.holiday@epa.gov>

Dear Holly:

Nothing in my Hg spreadsheet has been truthed/reviewed so there could be errors.

Personally, I believe Wisconsin is either hitting the bullseye (addresses Hg from a world perspective) or dodging the issue all together.

I received an email from Nebraska and her EPA contact told her new Hg criteria was coming out of the Idaho law suite this year. Since Hg and Se have been a running battle in Idaho for nearly 20 years she either has inside information or she is an optimist. Either are good things.

Pete
